FLIGHTHUB

THE ULTIMATE SOLUTION FOR MANAGING YOUR DRONE OPERATIONS

MANAGING YOUR DRONE OPERATIONS

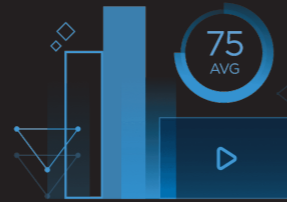

LIVE OPERATIONS

Enhance project coordination with real-time information from remote drone operations.

FLEETS & PILOTS

Increase team efficiency and communication by organizing your teams and records around projects.

FLIGHT DATA

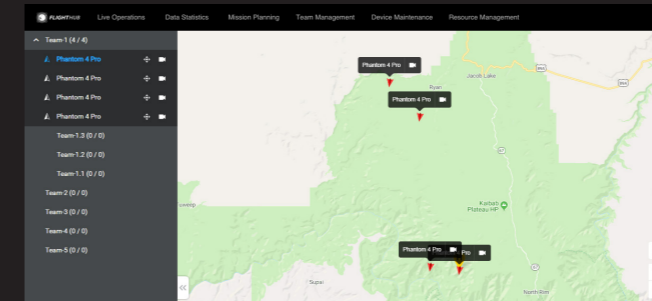

Improve operations management and ensure regulatory compliance with easy flight log recording.

MISSION PLANNING

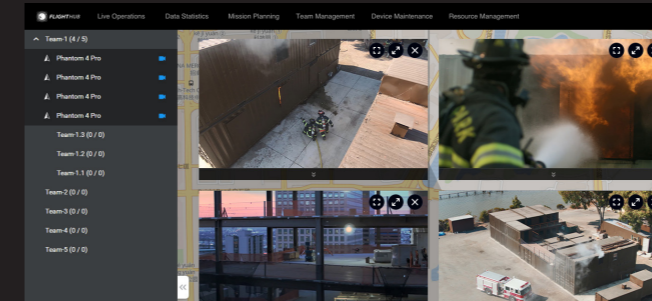

Manage operational tasks within teams more efficiently with easy-to-use mission planning tools.

LIVE OPERATIONS MANAGEMENT

MAP VIEW

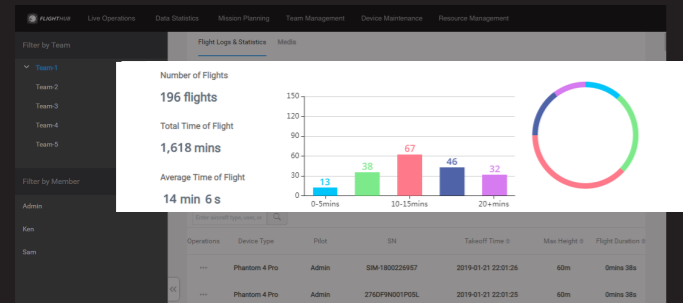

Rapidly assess your drone operations with telemetry data of your remote drone operations on a single map.

LIVE VIEW

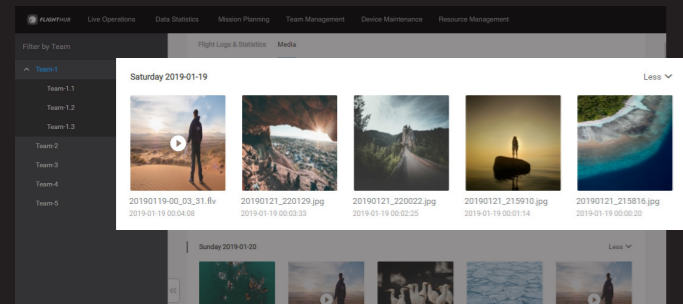

Enhance your workflow by connecting on-site pilots and office teams with a live stream from up to four drones.

FLIGHT DATA MANAGEMENT

FLIGHT LOGS & STATISTICS

Ensure compliance, understand equipment usage, view flight statistics, and replay missions with detailed flight logs.

FLIGHT MEDIA LIBRARY

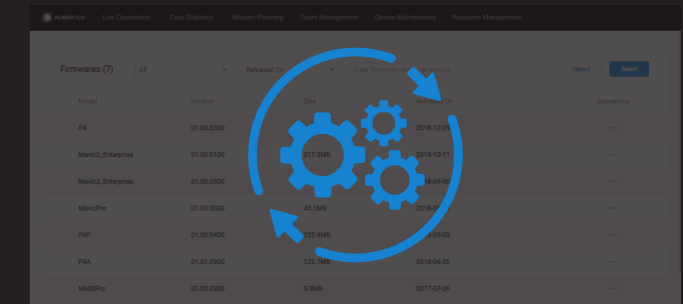

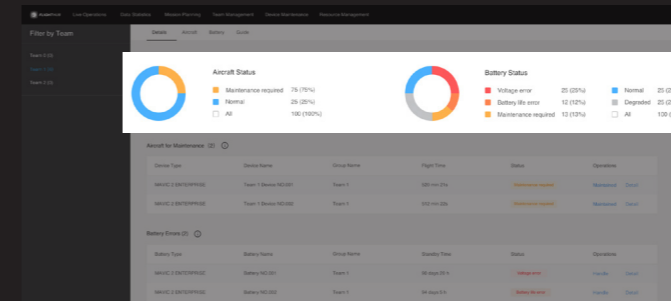

Save time and improve workflow efficiency with seamless video and image data transmission directly from your DJI Pilot mobile app to FlightHub.

FLEET AND PILOT MANAGEMENT

TEAM MANAGEMENT

Improve communication and operational efficiency by segmenting your teams based on project, region, client, or any other identifier.

FIRMWARE MANAGEMENT

Effectively manage firmware so you can ensure smooth operation of your fleet, helping you avoid any delays during critical missions.

DEVICE MAINTENANCE

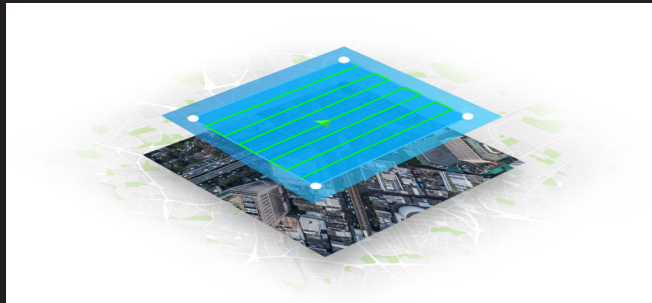

Get an overview of your aircraft status so you can keep track of the performance for each individual drone. You can also check your device's battery health, ensuring optimum functioning of your fleet across operations.

MISSION PLANNING

WAYPOINT

Effectively plan and store missions on FlightHub with mission planning tools that enable you to set waypoint flight paths, define waypoint actions and more. By integrating DJI Pilot with DJI FlightHub, users can upload or retrieve missions from the DJI Pilot mobile app, and quickly execute missions on site.

MAPPING

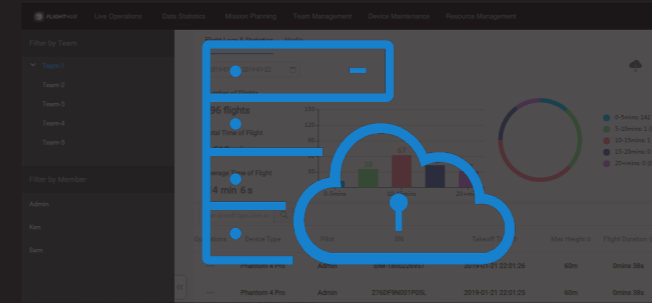

FlightHub automatically generates efficient flight paths after the user has set their required flight zone and flight parameters. The aircraft will then follow this route through its mission. The image data captured during these flights can be input into 2D reconstruction software to generate 2D maps, while the mission itself can be saved for re-use.

TWO WAYS TO DEPLOY FLIGHTHUB

Secure Cloud Access

FlightHub stores your flight logs on a stable, US-based AWS server with operational standards pre-assessed to match SOC2 standards.

Private Cloud Access

Utilize your existing organizational resources by managing all your commercial drone operations within your private network.

EASY INTEGRATION WITH YOUR FLEET OF DJI DRONES

DJI PILOT

Fully compatible with FlightHub, DJI Pilot is a robust mobile app developed specifically for enterprise users to unleash the power of their DJI drones.

DJI PILOT PE (PRIVATE EDITION)

DJI Pilot PE is a customized version of the DJI Pilot flight control app, which is exclusively deployed with FlightHub on a private cloud server.

DRONE COMPATIBILITY

DJI FlightHub is compatible with the following drone platforms through the DJI Pilot and DJI Pilot PE mobile apps: Matrice 200 Series V2, Matrice 200 Series, Matrice 600 Series, Inspire 2, Mavic Pro, Mavic 2 Enterprise, Mavic 2 Enterprise Dual, Phantom 4, Phantom 4 Advanced (excluding Phantom 4 Advanced+), Phantom 4 Pro (excluding Phantom 4 Pro+).

HOW FLIGHTHUB WORKS

Drone logs are sent to FlightHub's cloud platform from the DJI Pilot or Pilot PE app on your internet-connected mobile device.
